HIGHLIGHTS

- Developed an institutional-grade investment analytics platform integrating Python, PostgreSQL, SQL, and Power BI.
- Automated institutional investment reporting using Python, VBA, and Power Query, delivering significant reduction in manual effort.
- Delivered performance reporting and benchmark analysis for UK pension and institutional clients.
- Developed an Economic Assumptions reporting framework covering inflation, interest rates, and asset-class assumptions.
- Managed investment operations for HNI/UHNI portfolios exceeding ₹100 Cr+ AUM.

SKILLS

Programming
Python • VBA • SQL • Power Query (M)

Databases
PostgreSQL

Financial Platforms and BI
Power BI • Advanced Excel • Solovis • Ace MF NXT

Automation & Data Engineering
ETL • Workflow Automation • Data Validation • Reporting Automation • Process Optimisation

Investment Analytics
Portfolio Performance Measurement • Benchmark Analytics • Performance Attribution • Risk Analytics • Asset Allocation • Investment Reporting • Economic Assumptions

EDUCATION

MBA (Finance)
Specialization: Finance & AI
Delhi University
2023 – 2025

BSc – Physics(Hons)
VKS University • 2016

PROFILE

Investment Analytics and Analytics Engineering professional with 6+ years of experience delivering institutional investment reporting, portfolio analytics, benchmark analysis, and workflow automation for UK pension and institutional clients. Experienced in designing scalable analytical solutions using Python, SQL, PostgreSQL, VBA, Power Query, and Power BI to automate reporting, strengthen data quality, and improve operational efficiency. Strong background in investment performance measurement, financial data engineering, risk analytics, and business intelligence, with proven expertise in transforming complex investment data into scalable analytical platforms and decision-ready insights.

WORK EXPERIENCE

Mercer Consulting Pvt Ltd

Sep 2025 – Present

Senior Specialist • Gurugram

- Engineered automation workflows for investment reporting using Python, VBA, and Power Query, reducing manual effort and improving turnaround time.
- Led the Economic Assumptions reporting framework, delivering institutional reports covering inflation, interest rates, macroeconomic indicators, and long-term asset-class assumptions.
- Developed reusable reporting templates modules and standardised templates to improve reporting consistency and scalability across investment process.
- Automated data validation and quality assurance workflows, strengthening reporting accuracy and analytical reliability.
- Delivered portfolio performance reporting, benchmark analytics, and investment insights for UK pension and institutional clients.

Investments Specialist • Gurugram

Jan 2024 – Sep 2025

- Produced institutional investment performance reports by consolidating large datasets into standardized client deliverables.
- Automated recurring reporting processes using Python and VBA, improving reporting consistency and operational efficiency.
- Performed portfolio performance analysis, benchmark validation, and data quality assurance using Solovis and internal investment systems.
- Conducted internal data audits across reporting systems, improving accuracy and downstream analytics.
- Partnered with investment consultants to strengthen data governance and optimize analytical reporting workflows.

InCred Wealth

May 2023 – Dec 2023

Assistant Manager – Portfolio Analytics • Delhi

- Conducted portfolio reviews for HNI and UHNI clients, delivering insights aligned with investment objectives and risk profiles.
- Analysed performance across mutual funds, equities, PMS and alternative investments to support portfolio recommendations and asset allocation decisions.
- Leveraged Ace MF NXT to analyse fund performance, validate portfolio exposures, and develop investment dashboards.
- Translated complex portfolio analytics into actionable investment recommendations, enhancing client decision-making and relationship management.

Anand Rathi Wealth

Apr 2021 – May 2023

Account Manager • Delhi

- Managed client assets exceeding ₹100 Cr AUM ensuring operational accuracy and high service standards.
- Developed portfolio analytical reports, capital gain statements, and monthly investment reports supporting portfolio monitoring and decision-making.
- Performed portfolio reviews to analyse performance drivers, concentration risks, and allocation opportunities across client portfolios.
- Prepared investment presentations and portfolio insights to support investment recommendations and long-term financial planning.

ClovekWealth Pvt Ltd

May 2019 – April 2021

Analyst • Delhi

- Conducted research on financial markets, economic trends, and investment opportunities to support portfolio recommendations.
- Prepared investment reports covering asset allocation, risk analysis, and performance evaluation for management decision-making.
- Monitored retail client portfolios, identifying performance trends and recommending portfolio adjustments.
- Evaluated investment products and delivered mutual fund analysis using quantitative and risk-based assessment techniques.

Anand Rathi Wealth

Jan 2019 – Jul 2019

[Investment Analyst Intern](#) • India

- Supported portfolio analysis by researching market trends, fund evaluation, and investment product analysis.
- Assisted in preparing investment presentations aligned with client objectives and risk profiles.

KEY PROJECTS

Mizan Analytics – Institutional Investment Analytics Platform

Technologies: *Python | PostgreSQL | SQL | Power BI | Excel | VBA | Git*

- Developed an institutional-grade investment analytics platform for portfolio performance, benchmark analytics, risk measurement, and executive reporting using a modular, enterprise-style architecture.
- Engineered a modular, database-driven architecture comprising data validation, ETL, PostgreSQL, Analytics, Risk, Reporting, and Power BI Dashboard layers.
- Implemented analytics modules for portfolio returns, benchmark comparison, excess returns, security contribution analysis, volatility, Sharpe Ratio, and maximum drawdown, with automated report generation for institutional investment reporting.
- Built a centralized reporting framework integrating interactive Power BI dashboards, executive reporting datasets, and reusable analytics components to support multi-client portfolio analytics and future platform enhancements.

Quantitative Market Analytics Platform

Technologies: *Python | SQL | APIs | Pandas | NumPy | Power BI*

- Developed a quantitative market analytics platform to analyse 750+ NSE-listed securities using technical indicators, market trends, and rule-based trading signals.
- Engineered automated data pipelines for market data collection, transformation, indicator computation, and signal generation.
- Delivered real-time investment signals through Telegram integration and interactive Power BI dashboards.

Institutional Reporting Automation Platform

Technologies: *Python | VBA | Power Query | Excel*

- Developed a reporting automation platform to streamline institutional investment reporting through reusable and configurable automation modules.
- Integrated multiple financial data sources with automated validation, reconciliation, and exception handling.
- Engineered scalable reporting workflows and standardised reporting templates using Python, VBA, and Power Query.

Economic Assumptions Reporting Framework

Technologies: *VBA | Excel | Power Query*

- Built an automated reporting framework for consolidating macroeconomic indicators, inflation, interest rates, and asset-class assumptions into standardized investment reports.
- Automated data validation, transformation, and report generation workflows using Power Query and VBA.
- Built reusable reporting modules supporting institutional investment advisory and long-term capital market assumptions.

Business Workflow Automation Platform

Technologies: *Python | VBA | Excel | SharePoint*

- Developed a workflow automation platform featuring business-day scheduling, holiday-aware recurrence logic, and automated task lifecycle management.
- Engineered a rule-based scheduling engine supporting recurring workflows with overdue tracking and automated reminders.
- Integrated SharePoint and Python to centralize workflow execution through reusable automation components.
